

# SPECIALISTS IN... BIO-MIST / FOG DISINFECTING OF SURFACES

## Siqura Disinfectant & Protectant System

SIQURA Disinfecting & Protectant System is full range of Siqura products built on the Fresche Technology Platform that provides a complete solution for managing hand and surface hygiene in industry, workplace, recreation facilities, and homes.

Professional bio-mist / fogging applications available for commercial premises.

The active ingredient in SIQURA is an antimicrobial derived from coconut oil that is grafted onto a molecular adhesive. It's this adhesive that keeps the antimicrobial in place, helping to protect surfaces for much longer periods of time.

SIQURA is the smarter clean, being simple to apply, sustainable, non-leaching, long-lasting and above all, friendly to humans, pets and our environment. SIQURA contains no chlorines, bleaches, carcinogenic or endocrine disruptive compounds, and in final life, SIQURA breaks down to form harmless organic compounds. It is non-staining, pH neutral and non-corrosive, making it suitable for a wide variety of applications.

## Why Choose GermShield Solutions

- Your home and office is where you spend most of your time – keep yourself protected.
- When you have visitors, staff, suppliers or contractors – keep them protected
- Our Bio mist / fogging service and product range is targeted to help shield over longer periods than most traditional products currently available on the market.
- Siqura Hospital Grade Surface Disinfectant is listed in the ARTG # 338686 and can protect for up to 24 hours to 30 days on low touch surfaces.
- The hand sanitiser on our products page can protect you for up to 24 hours of single foam use.
- We are here to help shield you and those around you, with minimal fuss and disruption to your day

# PROFESSIONAL SURFACE DISINFECTION AND FOGGING / BIO MISTING SERVICE

The simple and effective way to protect surfaces in your workplace, venue or home

GermShields method of disinfectant bio-mist fogging releases a steady and even stream of droplets in the form of a dense fog mist which settle onto surfaces and into nooks and crevices that you can't reach with wiping or other cleaning methods.

Our process is safe and effective in killing bacteria and viruses to keep your building safe and clean.

It only takes one hour to fully disinfect the average business.

In our bio-mist fogging service we use SIQURA Hospital Grade Disinfectant.

Surface bio misting & fogging service Sydney wide

## Choose GermShield for your protection

We specialise in solutions to shield a variety of surfaces from germs and bacteria.

Our highly trained teams use Australian made industry specific products that are smarter, long lasting and the key antimicrobial ingredients are effective against Covid- 19.

Add a shield of protection in your battle against germs and bacteria and choose GermShield Solutions.

# HOSPITAL GRADE SURFACE DISINFECTANT & PROTECTANT

## DISINFECTS & PROTECTS FOR UP TO 30 DAYS

SIQURA™ 75HG Hospital Grade Surface Disinfectant is a simple and effective way to kill bacteria and protect surfaces continually for up to 24 hours on high touch surfaces and for up to 30 days on low touch surfaces.

SIQURA 75HG will destroy bacteria on the treated surface. Allowing the product to dry will also coat the surface with a microscopic protective layer for continuous microbial protection.

 up to 24 hours protection on high touch points

 up to 30 day protection on low touch points

 kills up to 99.999% of pathogenic microbes

 bonds to most surfaces

## LISTED ON THE ARTG - Entry: 338686

SIQURA Hospital Grade Disinfectant & Protectant is listed on the Australian Register of Therapeutic Goods as a hospital grade surface disinfectant that kills >99.999% of bacteria, and forms a long lasting, invisible barrier which defends surfaces against microbial attack (and biofilm formation), continually for up to 24 hours on high touch surfaces and for up to 30 days on low touch surfaces. The Siqura active is US EPA listed. SIQURA Hospital Grade Surface Disinfectant meets or exceeds EN1276 and AOAC 991.47/48/49 hard surface carrier test.

## BONDS TO APPLIED SURFACES

SIQURA Hospital Grade Surface Disinfectant is applied wet, onto clean dry surfaces. As it dries, it forms an organo silane matrix of electrostatically charged spikes that bond to a diverse range of surfaces and substrates. Unlike all non-bound disinfectants, SIQURA does not leach from (or leave) the treated surface, and it does not deplete in microbial efficacy or promote microbial resistance.

## CONTINUOUS NON-STOP PROTECTION

Through a bio mechanical process, the electrostatic charge interacts with the bacteria lipid layer, resulting in permanent destruction of bacterial cells. Because the organo silane isn't consumed in the disinfection process, it remains continually ready to defend treated surfaces against contamination and bio film formation.

## BROAD SPECTRUM PROTECTION

SIQURA Hospital Grade Surface Disinfectant has been tested against a wide range of pathogens including Human Coronavirus E229 (COVID-19), Escherichia Coli [ATCC 8739], Pseudomonas aeruginosa [ATCC 15442], Staphylococcus aureus [ATCC 6538], Enterococcus Hirae [ATCC 10541], Salmonella choleraesuis [ATCC 10708] and odours causing bacteria. SIQURA Hospital Grade Surface Disinfectant meets or exceeds EN1276 and AOAC 991.47/48/49 hard surface carrier test.

## HUMAN FRIENDLY/ECO FRIENDLY

SIQURA is the smarter clean, being simple to apply, sustainable, non-leaching, long lasting and above all, friendly to humans, pets and our environment. SIQURA contains no chlorines, bleaches, carcinogenic endocrine disruptive compounds, and in final life, SIQURA breaks down to form harmless organic compounds. It is non-staining, pH neutral and non-corrosive, making it suitable for a wide variety of healthcare and commercial applications.

# HAND SANITISER & PROTECTANT FOAM

## KEEPS HANDS CLEAN, FRESH AND PROTECTED FOR UP TO 24 HOURS

SIQURA™ Antibacterial Hand Sanitiser is a simple and effective way to stop contact-based infection.

SIQURA is alcohol-free and helps keep your skin soft and healthy. It is suitable for use by children, and can be used around food, pets and plants.

Unlike traditional alcohol based hand sanitisers that only provide short term protection, our unique QuatLok technology creates an invisible microscopic layer of protection on your skin which continually destroys bacteria for up to 24 hours\*.

 up to 24 hours continuous protection

 kills 99.99% of bacteria

 moisturises & protects

## UP TO 24 HOUR PROTECTION

SIQURA Hand Sanitising Foam kills 99.99% of germs and lasts up to 24 hours\*. SIQURA foam goes on wet and dries to form a long lasting, invisible, microscopic antibacterial barrier which protects your hands. If hands become visibly soiled, clean hands and reapply.

## SIMPLE & EASY APPLICATION

Apply SIQURA Hand Sanitising Foam to your hands, and rub together until dry. Once applied, SIQURA stays active, even after normal hand washing.

## NON-ALCOHOL FORMULATION

SIQURA Hand Sanitising Foam contains no alcohol, is non-flammable and is ideal for use on children and near food, plants and pets.

## SOFTENS AND MOISTURISES HANDS

SIQURA Hand Sanitising Foam will gently moisturise and protect your skin. The non-alcohol formulation will not dry, crack or damage your hands. Hands are protected, soft and smooth.

\*assumes typical daily activity
